Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

The following is a first action on the merits of application serial no. 10/533,829 filed on May 3, 2005.

Priority

Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Information Disclosure Statement

The information disclosure statement filed on May 3, 2005 has been considered.

Drawings

Figure 1 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). Corrected drawings in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Objections

Claims 5 and 6 are objected to because of the following informalities:

-the dependency of both claims should be changed to claim 2 instead of claim 1 since the operating sections were introduced in claim 2. Appropriate correction is required.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1, 4 and 6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Prior art Figure1 in view of McGinn et al ('201). As to claim 1, The prior art figure 1 discloses a motor (101), a camshaft (102) rotatably driven by the motor, a rail member (not referenced) separated from the camshaft by a predetermined distance and positioned parallel to the camshaft, first and second forks (104, 105) installed on the rail member such that they are spaced apart from each other and a first and second spring (not referenced) for elastically supporting the first and second forks and provided on the rail member. The prior art figure 1 does not disclose a cam fitted around the camshaft.

McGinn et al discloses a motor (100), a camshaft (102) rotatably driven by the motor, a rail member (122) separated from the camshaft by a predetermined distance and positioned parallel to the camshaft, a fork (120) installed on the rail member, a pin roller (118) is installed on a side of the fork to be selectively biased by an operating section (116) and a cam (114) fitted around and supported by the camshaft to selectively operate the fork on the rail member to effect a gearshift.

It would have been obvious to a person of ordinary skill in the art at the time the invention was made to provide the prior art with a cam in view of McGinn et al to provide accurate positioning of the fork.

Allowable Subject Matter

Claims 2, 3 and 5 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

-Bigi ('440) and JP 57065449A.
